

Apache: Is modpagespeed available on the Grid?

[modpagespeed](#) is not currently available on the Grid hosting system. We are evaluating the module to see how well it works in our environment. Yet, everything that modpagespeed does on the fly can be done by a competent web developer by following the advice of the [Pagespeed](#) addon for firefox, the [YSlow](#) addon for firefox, or the [Developer Tools](#) in Chrome.

Unique solution ID: #1013
